Dear

Right after our telephone conversation about Peter Berg's "barrier", I and behold the enclosed came across my desk for signature.

I thought you would be interested in having a copy of our reply to Berg, plus the attached from Jim Jacobs of Sandia relative to Berg's device. (I suppose, since I signed the letter for Rob, that Berg now will be calling on me daily rather than Rob - just what I needed!)

It was good chatting with you. Sorry about the other mixup with but at least you are forewarned. I will try to get over your way soon for that cup of coffee you promised.

STAT

Best regards.

Sincerely,

A handwritten signature in dark ink, appearing to read "M. Dowd", is written over the typed name.

Martin J. Dowd
